

SOLAR ENERGY

B.N.M College, Barhiya became the first implement the “SAAT NISCHAY YOJNA” & “PM GREEN ENERGY” in the region to install a solar plant, taking a step toward environmental consciousness. We installed a 15 kW Roof Top Solar Power Plant. This will provide nearly 100% of the institute's total power consumption. The Solar power plant installed will reduce carbon footprint emissions. This initiative is not only a step toward less reliance on oil and fossil fuels, but also a strong gesture toward preserving and protecting the green environment.
